

## OVER 4300 RESORTS WORLDWIDE AT YOUR FINGERTIPS...

with the world's largest resort database, *Born Skier*® is the quintessence of information about ski and after-ski for aficionados of winter, mountain and nature sports!

For David, the founder of *Natural Born Skier*®, skiing is a passion, a drug and an obsession. He loves nature, the mountains, the open space and as a third generation of international ski racer, he had this project in the back of his mind for a long time... Following 5 years of research, planning and development, here it is and although the site is about to be released, it is just the beginning of an adventure, an ongoing and endless project.

The website's homepage welcomes you with a clean uncluttered design, with featured content focused on our mission to provide accurate information using our home-made database system of over 4300 ski resorts worldwide, strengthen partner relations, and share knowledge and expertise in the field of nature, winter and mountain sports.

With the web's most completed, updated and user-friendly database of ski resorts, *Born Skier*® quickly guides you to the information you desire to find local businesses and professions, ski and after ski activities, events and more while planning or during a trip. Its purpose is to provide relevant eco-friendly services for all winter and mountain sports disciplines to "first timers", beginner and professional alike, and also specifically to disabled people.

We let users access information based on their own choice rather than sift through everything to decide what is of interest to them.

The users enjoy a comprehensible website with practical, easy to find content, articles and news on a variety of topics of interest.

[Bornskier.com](http://Bornskier.com) has no ads, no banners, no pop-ups!

We are releasing the site in English, French, German and Italian and will progressively be adding over 15 languages to include a wider and more diverse audience.
